

Service Technician – BMS / Controls / HVAC

Excellent opportunity to join an industry leader and growing business

About Us

A privately-owned Australian company, Controltech is a dynamic business specialising in building automation and control systems.

Highly regarded, Controltech are the market leader in the building automation and energy management space, with long term partnerships with leading edge global suppliers.

Due to an internal promotion, a vacancy currently exists for an experienced Service Technician to join our team.

Working closely with Senior Management and critical to the ongoing success of the business, the Service Technician role offers an exciting opportunity to develop your career with an established industry leader.

Reporting to the Service Account Manager, the successful candidate will be responsible for service, maintenance and commissioning of BMS / DDC Controls and building relationships with all levels of customers (owners, property managers, mechanical services and builders.)

Skills and Experience

- Minimum 3 years' experience in open protocol BMS / Controls / HVAC
- Solid knowledge and experience in HVAC fault finding and problem diagnosis
- Demonstrable PC experience in engineering software tools for programming of control systems
- High level of organisational skills and keen attention to detail
- Be able to present and communicate professionally both written and orally
- Excellent communication and client liaison skills

Qualifications

- Electrical, Instrumentation or Air-conditioning / Refrigeration (Trade Certificate or higher)
- Current OH&S induction card (Construction/White card)
- Valid driver's license and Australian citizenship/Australian work visa

This exciting role offers an attractive salary package, fully maintained motor vehicle and regular certified training programs.

Applications should be directed to Ben Carroll, Service Account Manager, by email
